- New fields have been added to allow the C-STARS interface to pass the C-STARS data to CAMS. The feeder system is the interfacing system which is passing the purchase order data to CAMS, for example, C-STARS. For manually entered documents, these fields are not enterable and the cursor will pass by them as you are tabbing through. The new fields are:
 - ◆ **Feeder Sys: No** – This field will be used to identify the document number passed from C-STARS or other interface sources
 - ◆ **Source** – This field will be used to identify the interface source
